

## One Trusted Partner Supporting Data Center Security Program at Every Stage

Data centers require consistent, scalable security programs that adapt as environments evolve. Allied Universal has supported more than 50M square feet of data center projects since 2014, across remote and multi-site environments. We support clients from early site development through full operations with integrated services, trained personnel, and advanced technology. Our teams help manage risk, maintain visibility, and support continuity across complex and often remote environments. With Allied Universal, you get the industry's largest provider and the widest service lineup, delivering people, technology, and support services through one unified solution.

### Security Across The Data Center Lifecycle

#### Site Development and Construction

- > Risk assessments, technology and site planning support
- > Mobile surveillance trailers and remote monitoring
- > Guard services and Mobile Patrol for access control and perimeter monitoring
- > Specialty services to include K-9, active law enforcement and drone patrol
- > Workforce housing security in remote locations

#### Commissioning and Transition

- > Security programming and standardization
- > System integration and testing support
- > Training aligned to site protocols
- > Badging technology as a service
- > Global Security Operations Center (GSOC) connectivity and monitoring readiness

#### Fully Operational Facilities

- > 24/7 security professionals and command center support
- > Integrated technology and AI-powered analytics
- > Visitor management and credentialing
- > Ongoing risk assessments, program management, and reporting
- > Scalable programs across multi-site portfolios

### Integrated Approach

#### There's Security in our Solutions.®

Allied Universal combines people, technology, and professional services to deliver a unified security program designed for performance, scale, and consistency.

**Security Professionals:** Highly trained teams aligned to mission-critical environments and site protocols

**Integrated Technology:** Access control, video surveillance, remote monitoring, and HELIAUS insights, providing on site teams with real time data and site intelligence. GSOC monitoring delivers 24/7 visibility, enabling faster incident response and stronger post event analysis.

**Professional Services:** Risk advisory, program management, and operational support

# Core Capabilities and Technology Stack

**Integrated Security Solutions:** Unified guarding, security integration, and visitor management tailored to high-risk environments across site development, commissioning, and fully operational facilities.

**Embedded Security Staffing:** On-site professionals trained in mission-critical data center protocols, supporting construction activities, system commissioning, and steady-state operations with support from a national Project Management Office (PMO).

**Scalable Technology Deployment:** Standardized system rollouts across multi-site portfolios, supporting speed, scale, and consistency from initial build through full operational maturity.

**AI-Powered Video & Analytics:** Smart surveillance with facial recognition, license plate reading, and perimeter alerts, enabling visibility from active construction zones to fully operational campuses.

**GSOC Integration & 24/7 Monitoring:** Real-time threat detection and incident response via centralized operations centers, supporting all phases from early site activity through steady-state operations.

**Risk & Asset Management:** Ongoing auditing, asset tracking, penetration testing, and SLAs, aligned to construction risk, commissioning requirements, and long-term business continuity goals.

**Adaptable Service Models:** From managed services to embedded teams, programs scale in alignment with each phase of the data center lifecycle and evolving client security maturity.

## Why Allied Universal

### Customized Data Center Security Training

Our security professionals complete customized Data Center Security Training, equipping them to operate within complex, high-availability environments and adhere to strict site protocols. They integrate seamlessly with facility staff, aligning to site-specific procedures while maintaining consistent standards across remote and multi-complex environments. Backed by a centralized Project Management Office (PMO), our teams bring specialized expertise and documented processes that enable scalable, consistent support as our clients grow.

### Remote Sites Covered by the Industry's Largest, Full-Service Partner

- > Experience supporting large-scale, multi-site environments
- > Local teams on site, backed by national scale to cover remote locations and deliver the full range of services.
- > Integrated model combining services and technology
- > Programs designed to scale with client growth
- > Centralized program management and reporting

**It's refreshing to finally partner with a guard force and technology provider that brings solutions to the table — not excuses — and consistently puts the customer first. Partnerships should be earned. Multi service providers must deliver reliable performance across the board. Security executives should not reward bad behavior."**

**Christopher D. Miller, CPP**
